## Sean O'Flaherty Fahey

January 23, 2006

On Sunday January 22, Sean Fahey died in a surfing accident off Ocean Beach in San Francisco. Sean was one of our best and brightest. We at CSA were all shocked and we miss him dearly.

Everyone who worked with Sean or interacted with him in other ways was impressed by his talent as an engineer and touched by the depth of his character. The hole he left will never be filled, but we'll continue our work inspired by his memory.

We hope to establish an engineering scholarship at the University of Vermont in Sean's name. Details will be forthcoming.
