

## CONTENTS OF A MODEL

A model is like a plan in a policy debate.

It should contain:

- Agent: who does it
- Action: what the agent does
  - Specific elements, conditions, methods
  - Anticipate opposition attacks, write them out
  - Time frame – implementation time
  - Example of something that worked
- Enforcement
- Funding: if it costs money, how you would pay for it
- Offer to provide additional details if opposition wishes
